Experience

Currently seeking my first professional opportunity. Have built hands-on projects and participated in online hackathons to develop practical coding experience.

Projects

Wanderlust – Rental Stay Booking Website (Ongoing)
Tech Stack: HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, EJS
A full-stack web app for listing and managing rental stays. Users can add, edit, delete listings, and leave reviews with ratings. Integrated MongoDB for storing listings and comments. Still working on user authentication and search filters.

Photography Portfolio Website

GitHub Repo: https://github.com/pranavcpatil/photography-portfolio
Tech Stack: HTML, CSS
A static website designed for professional photographers to showcase their work and services. Includes a photo and video gallery, exhibits section, customizable photography packages, online store, contact form with Google Maps integration, and feedback form. Fully frontend-based, built using only HTML and CSS.
